

CREATING TRELLO API KEY and TOKEN

You can create an API key on Trello and perform test calls by following the steps below.

1- Sign up for the Trello application with your email using the link

<https://trello.com/signup?returnUrl=%2Fpower-ups%2Fadmin>

(Don't forget to create your first workspace after registration)

2- Activate the Power-Up on Trello from the address

<https://trello.com/power-ups/admin>

A pop-up will appear during activation, and you can proceed by clicking Continue.

Privacy and compliance

We're glad you're here! To create new Power-Ups, we require that you have read and agreed to the [Trello Developer Terms](#).

☒ I acknowledge that I have read and agree to the [Trello Developer Terms](#).

[Cancel](#) [Continue](#)

3- Click the 'New' button located in the top right corner.

Power-Ups and Integrations

New

A better way to manage API keys

Each Power-Up can now have a unique API key and be managed by any collaborators. Get started by selecting a Power-Up and going to the API key page.

[Read the announcement](#) · [I'll do it later](#)

Looks like you've not built an awesome, custom Power-Up yet! Not sure where to get started? Don't worry, we've got you covered. Head on over to our [Power-Up developer documentation](#) to get started!

4- On the 'New Power-Up or Integration' page, fill in the following two fields and click the 'Create' button:

- Power-Up Name: Enter a name for your Power-Up.
- Workspace

The screenshot shows the 'New Power-Up or Integration' form. It has a title 'New Power-Up or Integration' at the top. Below it is a text input field labeled 'New Power-Up or Integration' containing 'PostmanTest'. An arrow points to this field. Below the field is a note: 'Don't worry, you can change this later.' Below that is a dropdown menu labeled 'Workspace' with 'Trello Workspace' selected. An arrow points to this dropdown. Below the dropdown is a paragraph of text explaining that the Power-Up belongs to the selected workspace. Below that is a text input field labeled 'Iframe connector URL (Required for Power-Up)' containing 'https://weather-power-up.netlify.com/'. Below this field is a paragraph of text explaining its purpose. At the bottom right are two buttons: 'Cancel' and 'Create'. The 'Create' button is circled, and an arrow points to it.

Don't worry, you can change this later.

Workspace

Trello Workspace

Your Power-Up/Integration belongs to this Workspace. Admins of this Workspace and the Power-Up's/Integration's collaborators will be able to manage this Power-Up/Integration. If you leave the Workspace, you will no longer be able to manage this Power-Up/Integration.

Iframe connector URL (Required for Power-Up)

https://weather-power-up.netlify.com/

Used to point to a HTML page that Trello will load onto the page as a hidden iframe and then Trello will use it to communicate with your Power-Up. Must be served over **https**. Only required if your Power-Up uses Power-Up capabilities. [Read more about iframe connector URLs and capabilities here.](#)

Cancel Create

5- After that, click the 'Generate a new API Key' button under the API Key section.

The screenshot shows the 'API key' section. On the left is a sidebar with a 'Back' link and a list of options: 'PostmanTest', 'Basic information', 'API key' (highlighted), 'Capabilities', 'Listings', 'Collaborators', 'Metrics', 'Privacy and compliance', and 'Delete Power-Up'. The main content area is titled 'API key' and features a key icon. Below the icon is a heading 'A better way to manage API keys' followed by a paragraph explaining that each Power-Up can have a unique API key. Below this is a form with two options: 'Enter existing API key' (with a text input field) and 'Use existing API key' (a blue button). Below these is the word 'or' and a button labeled 'Generate a new API key'. An arrow points to this button.
